"Redesigned to overcome conventions"

First boat of the 2.0 generation and overcoming the conventions of Bluegame boats.

With the usual attention to design and performance, it turns out to be much more than a simple evolution of its species: a boat suitable for open-minded owners, ready for immersive and extraordinary adventures.

Redesigned in line with the up-to-date technical evolution, the BG54 model presents the stern and bow areas improved in terms of ergonomics and functionality. The large spaces of the stern offer the possibility of a transformer that can be used both as a launching and hauling system, and as an immersed area. The bow, which is designed to be a unique and extraordinary space for this type of boat, is here perfected with a dinette that converts from a dining area to a lounge area.
